

**PRODUCT 100 % COMPATIBLE
WITH HEXIS FILMS**

SHAMPCARV2

The Concentrated Car Body Shampoo ProTech® is specially formulated to eliminate road grime and to revive the shine of your film-coated surfaces. It can be applied to all films and does not leave any mark after drying. Its foaming formulation also allows you to use it with a foam lance.

ADVICE FOR USE

- For a 3-litre bucket of water, add 20 ml or one measurement of the graduated ProTech® Car Body Shampoo bottle.
- For use with a foam lance, use 3 to 4 measurements for 500 ml of water.

The surfaces must be cold or at room temperature and protected from the sun.

- Rinse the car with a jet of water before applying the Shampoo.
- The Car Body Shampoo can be applied to the entire vehicle (car body, windows, plastics) with a soft sponge, starting from the top of the vehicle downwards, by rinsing the sponge regularly.
- Rinse with a large jet of water before the product dries.
- Dry the surface with a microfibre cloth in order to avoid any trace of limescale.

TIPS

- Apply the optional specific products (insects, etc.) before washing the car body with the Shampoo.
- Carry out the complete washing starting from the upper part of the vehicle. Finish with the lowest surfaces, often the dirtiest ones.
- Rinse the sponge frequently in a second bucket filled with clean water.

NOTES:
Prior to any use of the product, it is the responsibility of the user to verify the compatibility between the product and the surface to be treated. All the published information does not constitute a binding guarantee. The seller cannot be held liable for indirectly related damages and assumes no liability for claims that are higher than the replacement value of the purchased product. All specifications are subject to potential changes without prior notice. Our specifications are automatically updated on our website www.hexis-graphics.com.
