WHY USE THE BODYFENCE FILM?

To protect your paint

In accordance with new legal requirements, car manufacturers are obliged to use water-based paints to better preserve the environment.

These paints are less resistant on the surface to scratches or impacts.

The **BODYFENCE** paint protection film has been developed by **HEXIS** for long-term protection.

Thanks to its anti-shock, self-healing and self-cleaning properties, the **BODYFENCE** protective film offers perfect protection.

CHIPPING-RESISTANT

There are a million causes of paint damage from stones and gravel to road debris.

Resist the impact from these every day road hazards with **BODYFENCE**.

SELF-HEALING

Should your paint become scratched, the **BODYFENCE** protective film will regenerate with the help of heat from the sun or hot water.

Scratches appear on the car body when using automatic mechanical car wash brushes, when rubbing against bushes on road sides, during everyday use or due to an act of vandalism.

All these scratches will disappear from the surface of the protective **BODYFENCE** film thanks to the heat of the sun or just rinsing with hot water. Your original paint is preserved... **Forever Young!**
