BLACKLIGHT

HEXLIGHTS2

The HEXIS +

These ultra-clear products produce a crystal-tinted effect that allows the **maximum amount of light** emitted by the headlights to pass through.

These products are intended for use on show cars or cars used off the public highway (private roads, circuits, showrooms, etc.).

Please check the current applicable legislation in the country where the product will be used for any purpose other than that described above and before changing the appearance of lights, indicators or glass on the vehicle. *HEXIS cannot be held liable for any irregularities regarding non-compliance with current legislation in the country where the film is used.*
